

# Mohamad Faruk

Web Developer

## About Me

I am a web developer specialising in front-end development and UX/UI design. I am passionate about the process of creating innovative and performant applications that add value to people's lives. This passion has propelled me to learn a vast range of technologies with the aim of creating solutions to difficult problems.

## EMPLOYMENT

### **Roman Post – Web Developer** (May 2021 – present)

Work with clients on several projects designing modern accessible websites that act as businesses online presence, utilising a range of front end technologies.

### **NMC – Case Coordinator** (August 2019 – April 2022)

Responsible for managing the progression of cases so they are concluded within the appropriate time frame set within key performance indicators.

### **NMC – Case Admin** (March 2018 – August 2019)

## PROJECTS

### **Movie Watchlist App**

A React application that fetches data from a movie database API. It dynamically renders information on most movies and tv series. As an added feature, you are able to add movies/tv shows to a watchlist, which is saved to local storage. Additionally, the app was styled using Tailwind CSS and Daisy UI.

### **Roman Post Website**

A website I built for a local posting & printing company, which I have overseen over the course of a year since it's creation. I took the approach of using a CSS framework, Bootstrap, to create a professional website design, and vanilla JavaScript for the functionality.

## EDUCATION

### **ZTM Web Development Academy**

January 2021 – December 2021

### **Psychology (BSc) – University of Westminster**

September 2014 – May 2017

## SKILLS
