## Profile

A Web Developer specialising in front-end development and UX/UI design. I am passionate about the process of creating innovative and performant applications that add value to people's lives. This passion has propelled me to learn a vast range of technologies with the aim of creating solutions to difficult problems.

## Projects

### Movie Watchlist App

A React application that fetches data from a movie database API. It dynamically renders information on most movies and tv series. As an added feature, you are able to add movies/tv shows to a watchlist, which is saved to local storage. Additionally, the app was styled using Tailwind CSS and Daisy UI.

### Roman Post Website

A website I built for a local posting & printing company, which I have overseen over the course of a year since its creation. I took the approach of using a CSS framework, Bootstrap, to create a professional website design, and vanilla JavaScript for the functionality.

## Employment History

### Web Developer, Roman Post, London, UK

May 2021 — Present

Designed a modern accessible business website utilising up-to-date web technologies. The website acted as the businesses online presence, which as a result they experienced a surge of customers. As part of this role, I met with clients to determine website needs and followed up with regular discussions and updates.

### Case Coordinator, The Nursing and Midwifery Council, London, United Kingdom

August 2019 — April 2022

I manage the progression and development of cases so they are concluded within the appropriate time frame set within key performance indicators.

### Case Administrator, The Nursing and Midwifery Council, London, United Kingdom

March 2018 — August 2019

Managed and processed casework & complex legal documentation in accordance with legal procedures.
