

# MOHAMAD FARUK

## WEB DEVELOPER

### PERSONAL PROFILE

I am a former case worker who loves to create apps with code, specialising in front end development and UX/UI Design. I am passionate about the process of creating innovative and performant applications that add value to people's lives. This passion has propelled me to learn a vast range of technologies with the aim of creating solutions to difficult problems. I'm motivated to develop future skills that will make me a better developer and contribute to my long term goal of becoming an effective full stack developer.

### SKILLS

HTML & CSS	JavaScript
React JS	Sass
Node.js	Express
Bootstrap	Tailwind
Git/Git Workflow	NPM

### WORK EXPERIENCE

#### Web Developer

Roman Post | May 2021 - present

- Co-developed a dynamic, secure website from scratch in accordance to client specifications by writing code and designing pages
- Launched visually appealing, user-friendly site with interactive features
- Test website using a variety of browsers and debug where necessary

#### Case Coordinator

Nursing & Midwifery Council | Aug 2019 - Apr - 2022

- Managed progression of cases so they are concluded within the appropriate time frame
- Undertook investigation work to produce evidential documents
- Handled sensitive information in line with GDPR protocols

#### Case Administrator

Nursing & Midwifery Council | Mar 2018 - Aug - 2019

- Prepared complex legal documentation in accordance with legal procedures
- Managed witness financial reimbursement in line with NMC budget restrictions

### PROJECTS

#### Movie Watchlist App

A React application that fetches data from a movie database API. It dynamically renders information on movies and tv shows. This information is displayed on a modal, which prevents users from being taken to another page. As an added feature, you are able to add movies/tv shows to a watchlist, which is saved to local storage. Additionally, the app was styled using Tailwind CSS and Daisy UI.

#### Roman Post Brochure Website

A website I built for a local posting & printing company, which I have overseen over the course of a year since it's creation. I took the approach of using a CSS framework, Bootstrap, to create a professional website design, and vanilla JavaScript for the functionality.

## HOBBIES

I am an avid traveller, having spent a considerable amount of time travelling through Asia and going on plenty of hiking trips in the UK.

I am also passionate about fitness, where you can find me at my local gym on most days or playing badminton.

### CV Maker App

A React application which takes users data inputs, and prints a CV using the entered data. This project uses controlled forms, hooks and allowed me to practice using the Context API State Management. The CV printing feature was built with JavaScript, although it does this with minimal styling. The idea was to implement a CV template builder that quickly creates a CV without too many features.

### Note Keeper App

A simple React CRUD application which allows users to create notes for display. As is the case with CRUD apps, they are also able to read, update and delete notes. This project was an opportunity to practice React Hooks.

## EDUCATION

### Web Development Framework

Zero to Mastery Academy | Jan 2021 - Dec 2021

- Exposed to a range of industry standard languages and technologies such as JavaScript, React, Node.JS and Express.
- Built numerous projects and gained experience pair programming

### Psychology BSc

University of Westminster | Sep 2014 - May 2017

- Achieved an Upper Second Class Honours (2:1)

### Extended National Diploma in IT

City and Islington College | Sep 2011 - May 2013

- Achieved a Triple Distinction which is the equivalent of 3 A's in A Levels
