HOBBIES

- Avid Traveler
- Fitness Enthusiast
- Boxing & MMA Fan
- Book Lover
- Building Personal Projects

WORK EXPERIENCE

Web Developer
August 2021 - present

- Developed a visually appealing, user-friendly website for a local business. As a result, online sales and customer interaction increased significantly.
- Implemented web page designs when writing code in accordance to client specifications.
- Conducted website tests and debugged code where necessary.

Case Coordinator
Nursing & Midwifery Council | Aug 2019 - Apr - 2022

- Managed progression of over 200 cases so they are concluded within key performance indicators. This required proven time management skills and organisation in order to prevent delays.
- Used my excellent problem solving skills to complete investigation work as part of my case management duties.
- Work collaboratively with reviewing lawyers in order to complete caseload.

PROJECTS

See Projects: https://www.mohamadfaruk.com/#projects-section

Movie Watchlist App
- React application that fetches data from a movie database API
- Dynamically renders information on movies and tv shows. This information is displayed on a modal, which prevents users from being taken to another page.
- Users are able to add movies/tv shows to a watchlist, which is saved to local storage.
- Applied custom CSS, animation, and hover effects for a smooth transition between user interaction.
- App is mobile responsive and looks amazing on any device.
  Live version: https://movie-database-self.vercel.app/

Shopping Website
- A E-Commerce website that allows users to add products to a shopping cart and calculates the total cost of all items added.
- Utilises local storage so the products are saved whenever the page is refreshed.
- This project was built with HTML, CSS and JavaScript.
- Website is mobile responsive and looks amazing on any device.
  Live version: https://shopping-website-rose.vercel.app/

Box&Burn Website
- A website built for a fictitious Sports Fitness Company with the goal of testing my front-end skills using HTML, CSS and JavaScript.
- The website includes smooth scrolling and a hamburger navbar for an intuitive user experience regardless of what device the website is being accessed on.
- Utilises media queries for mobile responsiveness.
  Live version: **https://boxfit-landing-page.vercel.app/**

Note Keeper App
- A simple React CRUD application which allows users to create notes for display.
- As is the case with CRUD apps, they are also able to read, update and delete notes.
- This project was an opportunity to practice React Hooks.
  Live version: **https://note-keeper-app.vercel.app/**

EDUCATION

Web Development Framework
Zero to Mastery Academy | Jan 2021 - Dec 2021
- Exposed to a range of inustry standard languages and technologies such as JavaScript, React, Node.JS and Express.
- Built numerous projects and gained experience pair programming

Psychology BSc
University of Westminster | Sep 2014 - May 2017
- Achieved an Upper Second Class Honours (2:1)

Extended National Diploma in IT
City and Islington College | Sep 2011 - May 2013
